## RESEARCH TOWARDS THE DEVELOPMENT OF MEDICINE

### SCDHRL PATENT PRODUCTS

আমাদের পেটেন্ট প্রোডাক্টগুলির একটি নিজস্ব পরিসর রয়েছে যেখানে আমরা প্রায় প্রতিটি বিভাগের রোগ নিয়ে গবেষণা করেছি। আমাদের প্রোডাক্টগুলিতে ব্যবহৃত সংমিশ্রণগুলি চিকিৎসকবর্গের কাছে খুব আকর্ষণীয় যা রোগীদের সহজে এবং দ্রুততার সহিত চিকিৎসা করতে সহায়তা করে। প্রোডাক্টগুলি মূলত মাদার টিংচার দিয়ে তৈরি করা হয় শুধুমাত্র কঠোর পরীক্ষা এবং ইতিবাচক ফলাফলের পরে।

আমাদের পেটেন্ট প্রোডাক্ট পরিসীমা চূড়ান্ত পণ্য সর্বোত্তম কার্যকারিতা বজায় রাখার জন্য বিভিন্ন স্তরের পরীক্ষা এবং গুণমান পরিমাপের মধ্য দিয়ে পর্যবেক্ষণ করা হয়।

हमारे पास पेटेंट उत्पादों की अपनी श्रृंखला है जहां हमने लगभग हर श्रेणी की बीमारी पर शोध किया है। हमारे उत्पादों में उपयोग किए जाने वाले संयोजन चिकित्सा पेशेवरों के लिए बहुत आकर्षक हैं जो रोगियों को आसानी से और जल्दी से इलाज करने में मदद करते हैं।

अंतिम उत्पाद में इष्टतम प्रदर्शन बनाए रखने के लिए हमारे पेटेंट उत्पाद रेश की निगरानी विभिन्न स्तरों के परीक्षण और गुणवत्ता उपायों के माध्यम से की जाती है।

We have our own range of patented products where we have researched almost every category of disease. The compounds used in our products are very attractive to doctors who help patients to be treated easily and quickly. The products are mainly made with mother tincture only after rigorous testing and positive results.

Our patent products are monitored through various levels of testing and quality measures to maintain optimum performance in the final product.

The selection of plants and their parts for preparations of mother tinctures is done at SCDHRL at definite time when the required plants are rich in active constituents. These plants are cultivated without the use of fertilizer and pesticides. HPI standards are maintained in determining the moisture of the herbs, balance between moisture and mistrum electronically and they are macerated in extra-neutral Alcohol (E.N.A.). The freshly prepared Distilled water for at last three weeks. Specially designed hydraulic press are used under strict technical control to extricate maximum therapeutic concentrations from the macerated residue. Mother tincture are then analyzed through multiple disciplinary systems which is a standardization of the SCDHRL. Equipment like bottles, tubes micropipes are thoroughly cleaned, dry by demineralized water and dried at 150 ° C for an hour oven an over before use (Our aim is to attain the highest quality in preparing the Homoeo pathic alternation as per Hahnemannian method by successive potentization. The highest therapeutic efficacy and time stability are hallmark of SCDHRL'S Mother Tinctures.)

The backbone of Homoeopathy is the dilution and its curative power, therefore for effective medicines, dilution has to be made with precision and purity to ensure that SCDHRL has adopted elaborate measures :

1. All back potencies are exclusively made at SCDHRL for dilution.
2. Purest form of Extra Neutral Alcohol(ENA) in exact measures is used in back-potencies which are prepared under a computer-controlled potentiiser.
3. SCDHRL Dilutions are homogenous liquids that ensure a uniform percentage of distribution of medicament in every drop.

These dilutions are filled in a Pollution & Dust free air-conditioned non-contaminating environment. They are filled in non-reactive neutral glass bottles which are washed with demineralized water and dried at a high temperature. GMP standards are maintained to ensure that the dilutions are pure and perfect. Such strict quality control measures helped SCDHRL achieve recognized quality control certifications.

डिस्इंटेग्रेशन, बायोकेमिक, बायो केमिबिजेसन और बिजेथ उत्पादों से गोवियों के निर्माण के लिए एक आवश्यक जटिल प्रक्रिया की आवश्यकता होती है और इसी तरह मटर टिंक्चर और लैक्टोजेन का उत्पादन भी होता है। प्रत्येक गोली को प्रभावी बनाने के लिए सटीक मात्रा में नमक का उचित विद्युत आवश्यक है। इसके अलावा, टैब्लेट से आयतित लैक्टोजेन की गुणवत्ता समान रूप से महत्वपूर्ण है जिसे एससीडीएचआरएल में एवपीआई मानक के अनुरूप परीक्षण किया जाता है और एससीडीएचआरएल का गुणवत्ता निबंधन विभाग प्रत्येक उत्पाद की प्रभावकारिता सुनिश्चित करता है। उचित मात्रक प्राप्त करने के लिए (प्रत्येक गोली न तो बहुत नरम और न ही बहुत घबराती होनी चाहिए), समान वजन, और उचित प्रभावकारिता टैब-लेटिंग मशीनों को सख्ती से बनाए रखा जाता है और कुशल होता है। एवपीआई द्वारा निर्धारित मानकों को पूरा करने के लिए संघालिया।

गोवियों के प्रत्येक बैच के परीक्षण के लिए निम्न लघु टेस्ट :

- + डीटी (डिसिंटग्रेसन टाइम)
- + नमी की मात्रा
- + कठोरता
- + औसत वजन

अंतिम पैकेजिंग पूरी तरह से स्वचालित करने वाली मशीनों द्वारा लैक्टोजेन बोतल की बोतलों में की जाती है। इस प्रकार एससीडीएचआरएल टैबलेट को उच्चतम विधिकारीय प्रभावकारिता के लिए बनाया जाता है।

A highly complex process is required to manufacture tablets out of Trituration, Biochemics, Bio combination, and specialty products and so is the production of mother tinctures and dilution. To make each tablet effective proper trituration of salts in the right quantity is a must. Moreover, the quality of lactose imported from Holland is equally important which at SCDHRL is further tested to confirm with the HPI standard and the Quality Control Department of the SCDHRL ensures the efficacy of each product. To achieve the proper standard ( each tablet should neither too soft nor very hard ), uniform weight, and optimum efficacy the tableting machines are strictly maintained and skillfully operated to meet the standards laid down by the HPI.

Each batch of tablets is tested for:

- + DT (disintegration time)
- + Moisture Content
- + Hardness
- + Average weight

Final packaging is done in neutral sterile glass bottles by fully automatic filling machines. Thus SCDHRL tablets are made to have the highest therapeutic efficacy.
